###

Biocleaner, an international Environmental Reclamation Company specializing in restoration of ecosystems and Wastewater Systems headquartered in Los Angeles, California, began work on Anke Lake in the Capital City of Jakarta, Indonesia, on April 24, 2020.

BiocleanerIndonesia installed two Biocleaner Bio6 units in Anke Lake. All Biocleaner units hold the rare Green Patent A status from the United States Patent Office. Our water cleaning process is chemical free and places no load on the environment.

Biocleaner Bio6 units in operation on Anke Lake, Jakarta Indonesia

Eros Kaw, Global President of Biocleaner, and Dwi Handaya, Ir of BiocleanerIndonesia expect visibly cleaner and noticeable results within the next 90 days as Anke lake is transformed from anoxic to aerobic and nitrogen levels are drastically reduced.

Biocleaner plans instillation of several Bio6 units in Ft Pierce, Florida and other locations in the United States in the very near future upon re opening of the USA.
